

Lime Master Pro

The **Agromatic Lime Master Pro** is a 3-point tractor attachment used in applying hydrated lime to free stall beds with an adjustable flow. It is an ideal solution for barns using composted solids for bedding.

The dispensing unit has a hydraulic arm that extends over the beds. The lime is sent through the arm and applied to a 24" section of the stalls as the operator moves down the alley. A 12v vibrator attached to the side.

Dimensions:

81" full-unit width
40" deep
32.5" tall
75" inside width

Capacity:

.66 cubic yards

Standard Category 1 & 2 quick attach hitch

Options:
