## What do our customers say

**Peter Rostgaard** - "In the past, we found it very challenging collecting stones on our fields. We had 3 employees doing the work, so it became relatively expensive for us. After purchasing the Stoneless Stone Collector, we have been able to cut the cost by two-thirds - based on the experience we had in the spring"

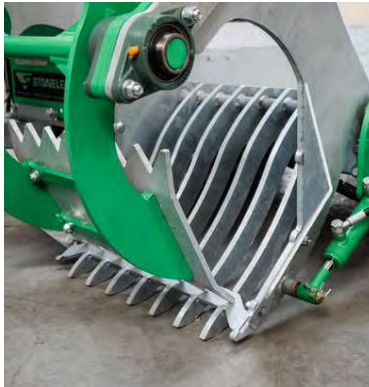

**Jacob Kloster** - "I have been using the stone collector over an area of 1350 acres this spring from morning to night. It's super easy! Normally we have always been two men collecting stones. By using the Stoneless stone collector, we have saved one man's work. On these 1350 acres I still don't need a hand-held bucket, the machine has been able to collect it all. Huge recommendation to use Stoneless"
