# Flat Barn Parlor

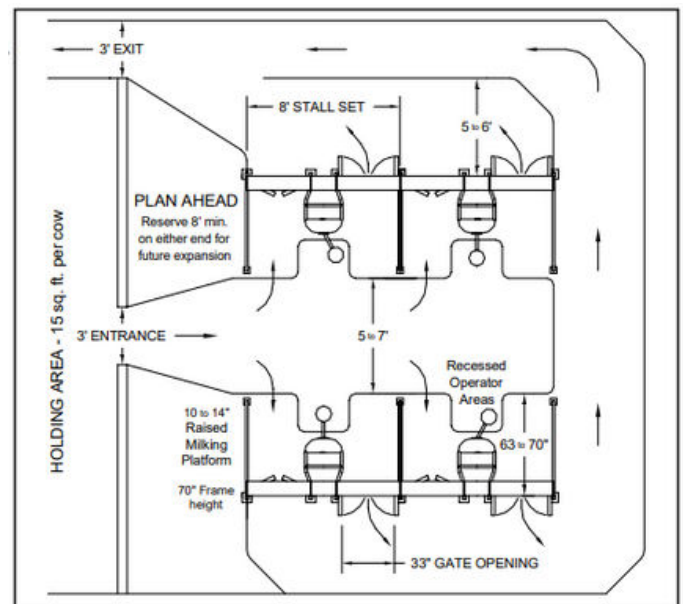

## FRONT EXIT

- Smooth, individual cow exits—no waiting.
- Quick milking: 56 cows/hour in Double Four!
- Cost-effective expansion.
- Gravity-operated—no air rams or hydraulics.
- Adapt to existing barns seamlessly.
- Enhanced comfort for cows and operators.
- Efficient: Reduce labor, boost productivity.

## Designed for Operator and Cow Comfort!

As cows enter, our system closes the gates, providing a 34" platform for them and leaving you a comfortable 32" x 24" area to work in. Our system lifts the cow, making milking easy on both you and her. When milking is done, a pull of the T-handle releases the cow and the gates return, ready for the next one.

Works seamlessly with major milking equipment brands. Our stalls and partitions are securely bolted and anchored to concrete, ensuring flexibility for easy relocation, replacement, or expansion of your parlor.
