

Agromatic[®] INC

Plank-Side Bunk Feeder

An Economical Push Button Feeding System

- ✓ **Built to give you years of trouble-free service!**
- ✓ **Sturdy**
- ✓ **Reliable**

Drive Unit - The powerful but efficient combination of v-belt and roller chain of the drive unit will give you years of satisfactory service.

Hanger Arch - Simple design and rugged construction assures long life on your farm. Ample clearance is given for a heavy flow of forage. Flow is controlled by simply raising or lowering the auger with the heavy threaded rod.

12" Auger - Features strong construction of 7 gauge galvanized steel. Designed to move large quantities of feed with even flow and meet the demands of any feeding system.

Auger Covers - Safety covers come standard and are available in 6' lengths. Made of 16 gauge stainless steel and can be fastened down to planks with lag screws.
